MANHOOD.

IN THE YOUNG AND RISING GENERATION, THE vegetative powers of life are strong, but in a few years how often the pallid hue, the lack-lustre eye and amaciated form, and the impossibility of application to mental effort, show its baneful influence. It soon becomes evident to the observer that some depressing influence is checking the development of the body. Observanting is talked of, and perhaps the youth is removed from the school and sent into the country. This is one of the worst movements. Removed from ordinary diversions of the ever-changing scenes of the city, the powers of the body too much enfeebled to give zest to healthful and rural exercise, thoughts are turned inward upon themselves.

If the patient be a female, the approach of the menses is looked for with anxiety, as the first symptom in which Nature is to show her saving power in diffusing the circulation, and visiting the cheek with the bloom of health. Alas! Increase of appetite has grown by what it fed on, and the energies of the system are prostrated, and the whole economy is deranged. The beautiful and wonder-ul period in which body and mind undergo so fascinating a change from chilld to woman, is looked for in vain; he parent's heart bleeds in anxiety, and fancies the grave but waiting for its victim.

HELMBOLD'S EXTRACT BUCHU, For Weakness arising from Excesses or Early Indiscre-

Attended with the following symptoms: Attended with the following symptoms:

Indisposition to Exertion, Loss of Power, Loss of Memory, Difficulty of Breathing, General Weakness, Horror of Disease, Weak Nerves, Trembling, Dreadfu Horror of Death, Night Sweats, Cold Feet, Wakefulness, Dimness of Vision, Languor, Universal Lassitude of the Muscular Hystem, Often Enormous Appelite with Dyspeptic Symptoms, Hot Hands, Flushing of the Bedy, Dryness of the Skin, Pallid Countenance and Eruptions on the Face, Pain in the Back, Heaviness of the Eyelids, Frequently, Black Spots flying before the Eyes, with Temporary Suffusion and Loss of Sight, Want of Attender, Great Mobility, Restlessness, with Horror of Society. Nothing is more desirable to such patients than Solitude, and nothing they more dread for Fear of Themselves, no Repose of Manner, no Expressness, no Speculation, but a hurried transition from one question to another.

These symptoms, if allowed to go on—which this Mo-dicine invariably removes—soon follow Loss of Power, Fatuity and Epiteptic Fits, in one of which the patient may expire. may expire.

During the superintendence of Dr. Wilson, at the Bloomingfale Asylum, this sad result occurred to two patients; reason had for a time left; ham, and b that if of opilops. They were of both sexus, and a kati wenty years of age.

Who can say that these accessors a new accurred.

Who can say that these excesses are and another followed by those direful diseases are suffered. The records of the Insane Asylems, and the melancholy deaths by Consumption, bear ample witness to the truth of these assertions. In Lunatic Asylems the most melancholy exhibition appears. The countenance is actually sodden and quite destitute—neither mirth or grief over visits it. Should a sound of the voice occur, it is rarely articulate.

"With wooful measures wan Despair Low sullen sounds his grief beguiled." Whilst we regret the existence of the above diseases and symptoms, we are prepared to offer an invaluable gift of chemistry for the removal of the consequences—
